SAN DIEGO PEAKS CLUB LIST

Original June, 1987 by Hannah North and Russ Weber

Revised 3-91, 3-92, 8-93, 12-93, 4-94, and 1-96 by Paul Freiman

History of the SDPC List

In June 1987, hikers Hannah North and Russ Weber (aka Amentia Allegro and Rass Webo respectively) combined their extensive knowledge of San Diego county's terrain with additional information obtained from maps of Cleveland National Forest. The result was a formidable list of peaks and a commitment to bag them all. Life, however, intervened and they moved away, but not before each had climbed about half the peaks. Taking up the cause I climbed every peak and benchmark (BM) on the original register. Then I eliminated insignificant climbs and areas of trespassing. In total I deleted 35 peaks and added 25 new ones. Preparing this list was such an enjoyable exercise that I still get all a-tingle thinking about climbing them again.

Overall the list is challenging, not because the hikes are especially hard (no rock-climbing or class 3 skills required), but because you will need good map reading skills. The 17 peaks preceded by an asterisk (*) are the distinguished Emblem Peaks, winning this designation for the incredible vistas each destination provides to those who seek these adventures.

Speaking of reaching your destination, you may either hike or mountain bike to do so. However, not only are drive-ups and helicopter rides illegal and disqualifying, they will earn you the antithesis of the coveted Hiker of the Month Award which is the Weenie of the Year Award.

Whenever visiting a peak, include as some of your "10 essentials" a pencil, paper, and empty can. The following explains:

Never let them say it

Say it to your shame

That a benchmark went untrodden

And without your date and name!

Wes Shelberg

I want to thank Wes Shelberg, Al Holden, and Jim Sugg for being terrific hiking buddies during the preparation of this list. Also a heartfelt and you-found-me-where-I-live thanks to Terri Sutor for introducing me to adventure hiking. Thanks to my wife Vicki for typing and editing this document.

Maps

Map coordinates are based on Cleveland National Forest (CNF) 1985 map. USGS topos are 7 1/2'. Completion of this list is dependent upon your map reading and orienteering skills (or buying a cheesy GPS device).

Other Notes

"Pyramid", "Mile High", and "Square Top" are three peaks mentioned in Jerry Schad's Afoot and Afield in San Diego County (1986 edition) and nowhere else. The reference Schad is to this book. The following abbreviations found in the list refer to sections of the Angeles (LA) Chapter of the Sierra Club: DPS=Desert Peaks Section; HPS=HundredPeaks Section; LPS=Lower Peaks Section.

GOOD LUCK AND GOOD HIKING!!
